

MYCLOUDIT – THE BEST ALTERNATIVE TO THE “DEPRECATED” AZURE REMOTEAPP

MyCloudIT is a comprehensive application & desktop delivery platform that enables you to quickly deploy, manage, and monitor Remote Desktop Services in Azure. With the retirement of Azure RemoteApp looming, the time to act is now!

WHO WE ARE

MyCloudIT is an Azure Desktop and Application Hosting platform that allows partners to seamlessly deliver remote desktops, remote applications, and IT infrastructure for SMB and enterprise customers. The MyCloudIT platform reduces deployment time by 95 percent, saves 30 percent or more on Azure consumption, and helps drive cloud business with no additional overhead or extensive Azure training.

WHAT WE OFFER

CERTIFIED MIGRATION

MyCloudIT is proud to be a Microsoft-certified Azure RemoteApp (ARA) Migration Partner. Our Injectable Solution allows you to deploy into your existing ARA virtual network, so you can quickly replace your ARA deployments. Contact us for a free migration assessment!

CENTRALIZED MANAGEMENT

The MyCloudIT platform integrates seamlessly with multiple Azure services (i.e. Backups, Office 365, Azure Schedule, Monitoring), Azure subscriptions, and RDS licenses. You can enjoy the ease of managing all customer deployments from a single pane of glass.

PREDICTABLE PRICING

MyCloudIT's Pay-As-You-Go pricing allows you to scale from 1 to 100s of users with no minimum requirement. Leverage our Cost Estimator & automatic Scheduler to keep track of and manage your monthly costs while saving 30% or more on Azure consumption.

DEDICATED SUPPORT

MyCloudIT's standard support is baked in our license fees and available to all admin users. We'll take care of your RDS deployments, so you can focus on upselling additional services. Fully-managed desktop and application solutions are also available upon request.

WHAT OUR CUSTOMERS ARE SAYING

"It was the easiest migration we've ever done. We migrated five legacy applications with customer data over three business days – So far it's been a great user experience, more admin capabilities, and similar cost to Azure RemoteApp."

– Chandler Julian, ERISA Partners
