Cloud Readiness Checklist

More and more companies are moving their business to the cloud to capitalize on performance and cost benefits. Is your business, or your customer's business, ready to move to the cloud? Below are some questions to ask to determine cloud readiness. If the answer to any is yes, then there are likely performance or cost benefits to be realized from a move to the cloud.

Hardware Upgrade | Refresh

PC Refresh   Do you need to replace workstations?

Server Refresh   Is it time to upgrade servers?

Remote | Mobile Workforce

Multiple Offices   Do you have multiple offices?

Work from Home Policies   Are your employees working from home who need to access sensitive data or applications?

Bring Your Own Devices ("BYOD")   Do you want to enable secure BYOD policies?

Remote | Mobile Workforce   Is your workforce remote or highly mobile?

Economic Motivations | Factors

Transition from CapEX to OpEX   Are you ready to transition from a Capital Expenditures model to an Operational Expenditure model with your IT infrastructure?

Predictable Monthly IT Budget   Do you want to have a predictable monthly IT budget?

High Growth/ Scalability   Are you expecting to rapidly scale your business?

Need for Seasonal / Temp Workers   Do you work with many seasonal or temporary workers that have access to sensitive data and applications?

Targeting Bigger / New Customers   Are you looking to grow your customer base?

Security Requirements   Are you looking for a solution that has comprehensive security requirements in place?

Compliance Requirements   Are you in a regulated industry where there are compliance requirements on data?

Heavy Use of Client Server Applications   Do you engage in heavy usage of applications hosted on your servers?

Merger or Acquisition   Are you going to be acquiring or merging with another company soon?
